

THE SOLUTION TO PREVENTING THE SPREADING OF CONTAGIOUS DISEASES IN ELEVATORS

The LIBU button **automatically sanitizes its touch surface after usage** without human intervention and without consumables. It is the modern tool you need to safely, economically and effectively **reduce the incidence of contact transmission** of diseases caused by bacteria and viruses.

The LIBU uses a **patented ultraviolet technology** and was demonstrated to effectively **neutralize pathogens in seconds**, including antibiotic-resistant bacteria.

A drop-in replacement solution for traditional elevator button and floor call buttons.

It is the modern tool you need to safely, economically and effectively reduce the incidence of contact transmission of diseases caused by bacteria and viruses. It is also compatible with traditional cleaning protocols for ease of adoption.
